

Mr. Campbell Hennessy

Canadian Coast Guard

- Campbell Hennessy started working with the Canadian Coast Guard in 2010 as a seasonal deckhand and eventually coxswain in the Inshore Rescue Boat Program while he completed his bachelor's degree in computer engineering at Carleton University.
- After obtaining a master's degree in technology policy from the University of Cambridge he worked briefly as a technology strategy consultant in the private sector before following his passion and enrolling in the Canadian Coast Guard Officer Training Program as a navigation officer.
- Since completing the program in 2019 he has worked as a navigation officer in the St Laurent sector primarily on icebreakers as well as a winter ice season as an Icebreaker Operations Officer. He currently serves as a navigation officer on the CCGS Amundsen.
- He continues to combine his dual passions for technology and navigation by getting involved in the Coast Guard's e-navigation transition. He is currently a ECDIS trainer for the fleet and is involved in a variety of projects to enhance the navigation information available to Coast Guard navigators.
