

Mr. Johnny Schultz

Sev1Tech
RTCM Chair SC138

- Johnny Schultz is a system engineer currently working under contract with the spectrum management office of the US Coast Guard.
- He brings 30 years of experience in maritime electronic system design, including communications, navigation, identification, tracking, and surveillance.
- During his time with L-3 Communication, Johnny Schultz was the lead system engineer and primary software developer for their AIS product line, including Class A mobiles, base station, airborne, and AtoN stations.
- Johnny Schultz is a member of various international organizations dealing with the developing and standardization of radio communication systems. These include the International Telecommunication Union (ITU), International Association of Marine Aids to Navigation (IALA), International Electrotechnical Commission (IEC), and Radio Technical Commission for Marine Services (RTCM).
